## INTRO:

### VERSE 1:

|                                   |                 |                         |
|-----------------------------------|-----------------|-------------------------|
| I'm running                       | on empty        | my motor's gonna stall  |
| So just leave me                  | at the roadside | cos life's a heavy haul |
| All I want is to be free and easy |                 |                         |

### VERSE 2:

|   |                 |                              |
|---|-----------------|------------------------------|
| I'm spinning  | not winning     | I'm chasing my tail          |
| I found a   | a new direction | I got to find a better trail |
| I found a trail that takes me to where I'm walking cruisy |                 |                              |

### CHORUS 1:

I'll lose them, won't chose them, it's time for me to feel brand new  
I'm sailing the feeling and I know the ropes that I'll undo

### VERSE 3:

|  |                     |                                    |
|--|---------------------|------------------------------------|
| My hairs tangled                             | aint gonna brush it | there's not a mirror in this place |
| I'm smokey                                   | I'm by the campfire | can't wipe the smile from my face  |
| Oh I'm smiling and feeling really Boozie.... |                     |                                    |

## SOLO:

### BRIDGE:

|                        |  |
|------------------------|--|
| Confusion delusion     | I just can't think straight anymore        |
| Suppression aggression | they're not taking me like they did before |

### CHORUS 2:

I'll lose them, won't chose them, it's time for me to feel brand new  
I'm sailing the feeling and I know the ropes that I'll undo

### VERSE 4:

|   |                           |
|---|---------------------------|
| I'm not spinning... now I'm winning                       | I'm not chasing my tail   |
| I found a... a new direction                              | I found me a better trail |
| I found a trail that takes me to where I'm walking cruisy |                           |
| I found a trail that takes me to where I'm walking cruisy |                           |
| I found a trail that takes me to where I'm walking cruisy |                           |
